

# THE MANY BODIES OF TRIXIE – THE PARALLEL UNIVERSE JUMPER

A Collection Of Composites Featuring Eva’s Face On Various Artworks And  
Paintings

Since quantum physics, string theory and alternate universes first came onto the scene not so long ago, there have been many interesting things unfold in people’s minds.

Some people believe that we’re living in an alternative universe environment where we’re continually ‘jumping’ from one universe to another and that this could be an explanation for the ‘Mandella Effect’, along with many other things experienced in our lives. It appears that many leading scientists around the globe are looking into alternate universes and the bending of time and space etc.

So, what would it be like existing in another one of the many other alternate universes? Would we still occupy the same body types that we have now? Would our lifestyle be vastly different or would there be just a few subtle changes? With the many other universes that are supposed to be out there, all of the above, plus more, is possible.

It’s based on these ideas that I’ve placed Eva (aka Trixie) or, at least her face, into images that show a different body type and situation to what she normally experiences. One can see how such a pretty, playful face would look on various body shapes and personages.

Thanks to the artwork and imagination of many talented people (who are not attached to this project), we can now see Trixie in all of her many forms. Enjoy the journey as Trixie jumps from body to beautiful body in her multiple universe travels.

Note: The following work started off with a couple of ‘playful transformations’ and got the author totally involved, where new and exciting images came along and eventually led to this collection. Once again, thanks to the various models and artist’s works that are on display.
